

The database update subscription service is offered to provide current, accurate navigation information for your UNS System. Navigation databases are compiled from official State sources and supplied to Universal Avionics Systems Corporation by Lufthansa Systems (Lido). Navigation databases may also include customer tailored data not originating from a State authority, such as at private airports/runways and private arrival/departure procedures. The end user has the responsibility to verify the suitability of this data for the intended operation. Updates are available for download from Universal Avionics web site or are provided on 512MB USB Flash drives (SCN 603-604 and 703-704). The database updates are loaded into the UNS System via the Data Transfer Unit (DTU), the DTU-100 (SCN 603-604 and 703-704) or the SSDTU data transfer unit (see note below).

Regions: The accompanying map shows the ten ARINC areas used to describe coverage. The database region selected determines the geographic coverage.

Contents: **Standard DTU:** Airports, nav aids, airways, terminal waypoints and enroute waypoints are included on the STANDARD disk, SIDs, STARs, approaches and runways are included on the EXTENDED disk(s) for each region.

DTU-100 and SSDTU: Airports, nav aids, airways, enroute waypoints, SIDs, STARs, terminal waypoints, approaches and runways are included on the Zip disk or USB Flash drive for each region.

Navigation information includes:

Airports: Public use airports with plain-language references for locations having one hard surfaced runway at least 2,000, 4,000 or 5000 feet long, depending on the coverage selected. Some private airports, and some airports with soft-surfaced and gravel runways are included.

Nav aids: Nav aids with plain-language references for: VHF nav aids (VORs, VOR/DMEs, VORTACs, TACANs, DMEs, ILS/DMEs) and NDB nav aids.

Airways: All high and low enroute airway routes published by government agencies.

Intersections/Waypoints: All enroute waypoints (intersections) published by government agencies for on-airway and off-airway navigation. All terminal waypoints (intersections) associated with SID, STAR, or approach procedures.

SIDs, STARs and Approaches: For included airports, SIDs, STARs, and approaches, including transitions and missed approach procedures. As specified for each part number, includes ILS, LOC, BC, GPS, VOR DME RNAV, VOR, VOR/DME, NDB and TACAN approaches. When procedures with multiple indicators exist, only one procedure will be included. For example, if there are two ILS approaches to runway 23 charted as "ILS Y Rwy 23" and "ILS Z Rwy 23" only the ILS Z Rwy 23 will be included, and will be displayed as "ILS 23" on the FMS. RNAV (GPS) and RNAV (GNSS) procedures are included as GPS procedures. The navigation data contains a maximum of 99 SIDs, STARs or approaches at any particular airport. Some private and some special-permission required SID, STAR and approach procedures are included.

Runways: Runways at included airports with a minimum length of 2000, 4000 or 5000 feet, as applicable. Some private runways, and some soft-surfaced and gravel runways are included.

Navigation information does not include:

- Vector only procedures
- Visual procedures
- VFR reporting points
- BC Circle to Land, Localizer Circle to Land, LDA, and SDF approaches
- NDB approaches outside the USA and Canada that are not approved for GPS overlay by the State authority
- Approaches having final approach course changes greater than 6.0 degrees, or a course change within the final approach coding at a waypoint other than the FAF
- Step-down fixes as part of the final approach coding
- SIDs, STARs or approaches using waypoints or nav aids outside the database coverage area

Updates: The annual subscription service includes thirteen updates shipped on a 28-day cycle. The navigation information is only valid for the 28-day period for which it was produced. New updates are sent from Universal Avionics prior to the effective date of each cycle update. Return expired USB Flash drives to Universal Avionics for recycling.

NOTAMs/ALERTS: NOTAMs and Navigation Database Alerts are available at http://fms-info.lhsystems.com/FSA_NDA.htm.

RTCA/DO-200A Universal Avionics complies with applicable RTCA/DO-200A and FAA requirements as they apply to navigation databases for use by end customers in Universal Avionics' flight management systems with software control number 601.x/701.x or later. Universal Avionics publishes the compliance status and information concerning any data problems found during processing or after delivery on the company website at <http://www.uasc.com>.

The navigation databases may contain customer tailored data not originating from a State authority, such as private airports and runways or private arrival or departure procedures. The end user has the responsibility to verify the suitability of this data for the intended operation.

As defined in RTCA/DO-200A, the end user has the ultimate responsibility to ensure the data requirements are met. These responsibilities are satisfied, in part, by obtaining navigation data from an RTCA/DO-200A-compliant supplier such as UASC. By using UASC navigation data, the end user accepts the data quality requirements defined by UASC in the UASC *RTCA/DO-200A Compliance Plan for the Navigation Databases*, a copy of which can be obtained from UASC upon request. **Further, per RTCA/DO-200A, the end user should verify the navigation data is current, valid, and appropriate for the intended operation. The end user also should become familiar with applicable notices to airmen (NOTAMs), Lufthansa Navigation Database Alerts, NavBlue FMS Navigation Database bulletins, NFD alert notifications, and UASC Navigation Data notices and alerts that may affect operation. Finally, the end user should notify UASC if it discovers an error or inconsistency in the data.**

TRIP KITS: A one-time update for any coverage other than your subscription may be ordered from Universal Avionics, as required.

A separate navigation database license subscription is required for each aircraft or simulator training device using Universal's Software. Subscriptions are non-refundable when cancelled.

To start your update service, please complete the enclosed order form and return it to Universal Avionics via fax at (520) 295-2395 or e-mail to dbsales@uasc.com. You may also complete this form online and submit it to us electronically. The forms are located on our website, <http://www.uasc.com/home/support/subscriptionsordering>. For questions, please contact Universal Avionics Navigation Database Sales at (520) 295-2300 or (800) 321-5253. E-mail: dbsales@uasc.com.

Note: The SSDTU (PN 1408-xx-x or 1409-xx-x) is available as a replacement for the standard DTU (PN 1403-xx-x, 1404-xx-x or 1405-xx-x). For FMS SCN 601-602 or 701-702, multiple USB flash memory sticks or SD cards must be used for multiple disk sets—one USB or SD per disk. Navigation database service for SSDTU is only available as download-only for FMS SCN 601-602 or 701-702.

The subscription is non-refundable

17 Aug 2022

**STANDARD DTU (SCN 601-604 or 701-704)
SSDTU (SCN 601-602 or 701-702)
Long Range Coverage—Runways 5000’ and Longer**

Contains VHF and NDB nav aids with plain language references, enroute and terminal waypoints, high and low altitude airways, airports (runways 5000’ and longer), SIDs, STARs, and approaches.

1350-C5 (set)

EEU-EUR-PAC-SPA

1350-D5 (set)

CAN-LAM-PAC-SAM-USA

1350-E5 (set)

CAN-EUR-USA

**Includes one approach per runway using the following priority:
GPS, ILS, LOC, BC, VOR DME RNAV, VOR, NDB, TACAN**

**STANDARD DTU (SCN 601-604 or 701-704)
SSDTU (SCN 601-602 or 701-702)
Intermediate Coverage—Runways 4000’ and Longer**

Contains VHF and NDB nav aids with plain language references, enroute and terminal waypoints, high and low altitude airways, airports (runways 4000’ and longer), SIDs, STARs, and approaches.

1350-F4 (set)

LAM-SAM-USA
See Note Below

**USA does not include NDB approaches.
Includes two approaches per runway using the following priority: GPS, ILS, LOC, BC, VOR DME RNAV, VOR, NDB (excluding USA), TACAN**

1350-G4 (set)

CAN-LAM-USA
See Note Below

Includes two approaches per runway using the following priority: GPS, ILS, LOC, BC, VOR DME RNAV, VOR, NDB, TACAN

1350-A4 (set)

AFR-EEU-EUR

Includes two approaches per runway using the following priority: GPS, ILS, LOC, BC, VOR DME RNAV, VOR, NDB, TACAN

1350-B4 (set)

CAN-EEU-EUR-PAC

Includes two approaches per runway using the following priority: GPS, ILS, LOC, BC, VOR DME RNAV, VOR, NDB, TACAN

**STANDARD DTU (SCN 601-604 or 701-704)
SSDTU (SCN 601-602 or 701-702)
Regional Coverage—Airports 2000' and Longer**

Contains VHF and NDB nav aids with plain language references, enroute and terminal waypoints, high and low altitude airways, airports (runways 2000' and longer), SIDs, STARs, and approaches.

2022 Prices (Renewals or new service with start dates from 1 January 2022)

Universal Avionics’ web-based navigation database download service, UniNet, provides superior reliability and integrity for every download and is an excellent low-cost alternative to receiving navigation data on disk or USB flash drive.

Learn more about UniNet by exploring the site yourself. Register at <https://secure.uasc.com/uninet/Register.aspx>.

	<u>Download-Only Price</u> Navigation Database Service	For USB flash drive shipping, add: Media & Handling Fee	<u>USB Flash Drive</u> <u>Delivery Price</u> including Media and Handling Fee (see Note below for shipments outside the USA)
Corporate/Business	\$3,400.00	\$2,275.00	\$5,675.00
Air Carrier Government/Military Helicopter	\$5,100.00	\$2,275.00	\$7,375.00
Each Additional Region	No Charge	n/a	\$500.00

Customers who receive their navigation database updates on physical USB flash drive (available for SCN 603-604 and 703-704 only) will be charged the media and handling fee of \$2,275.00 per year in addition to the base license fee for each database subscription.

The only media which is available for shipping is the USB flash drive, as Universal Avionics has discontinued the shipping of all other media types.

NOTE: For locations outside the USA, navigation database packages must be sent via an express carrier (FedEx, DHL or UPS). Universal Avionics’ default shipper is DHL, but if you have a different preferred carrier, please indicate this on the order form, along with your account number if we will be shipping collect. If no preferred carrier or account number is provided, we will ship via DHL and add the shipping charges to your invoice.

The subscription is non-refundable

IF SHIPPING WITHIN THE USA, IS YOUR DATABASE EXPIRED? Yes No

If so, do you want the initial update shipped by FedEx? Yes No

Shipping charges will be added to the invoice, or for collect shipping please provide your acct #:

We will e-mail order confirmation and a copy of the invoice after the order is entered.
For credit card payments, pay on line through UniNet; or contact Universal Avionics Accounts Receivable during normal business hours with your credit card details and invoice number at 800-321-5253 or 520-295-2300.

The Database Update subscription service, provided to support UNS System(s), is comprised of copyrighted data compilations and programs owned by Jeppesen. Customer agrees that he shall not copy, distribute or use any portion of any said copyrighted subject matter, except in connection with the ordinary and intended use of the UNS System(s) installed in the aircraft identified above. Customer acknowledges and agrees to comply with the explicit condition of sale which allows the corresponding subscription to be used to update only the aircraft as referenced above.

This subscription is non-refundable.
